Product title | 1SKB-R2U SKB 2U Roto Rack

Description

SKB's Non Shock Roto Racks meet the needs of musicians and pro audio engineers. These Roto Racks include full front and rear covers for easy access, with gasket seals to prevent water from entering into the case and harming your sensitive equipment. Feel safe wherever you are and wherever you go!

These Roto Racks have an exterior design featuring SKB's recognizable bar design that signifies the rack size on the front and rear covers; these bars also provide interlocking capabilities allowing you to easily and securely stack them with SKB's Rolling Roto Racks and Shallow Racks. That makes transporting them even more convenient and secure! Roto Racks also come standard with steel Mil-Spec black twist latches which are recessed for extra durability and longevity, new heavy-duty flush handles, and front and rear rack rails with a rack depth of 17.6". These models will accommodate various audio and video devices such as video switchers, power amps, and power conditioners. Typical applications are in music, pro audio/video and many more markets.
