Cameo MATRIX PANEL 10 W RGB - 5 x 5 RGB LED Matrix Panel with Single Pixel Control

With a 5 x 5 array of 10 watt RGB LEDs, 40° beam spread and flicker-free performance the Cameo Matrix Panel creates exciting blinder, chase and strobe effects. Featuring powerful single pixel control, it is the perfect choice for mapping alphabetic characters, numerals and complete messages. Recessed latches on all sides enable joining multiple panels for large, impressive backdrops.

The Matrix Panel 10 RGB includes five modes of DMX control, sound activation, built-in auto run programs and 4 selectable dimming curves. It sports master, slave and standalone capability, a bright 4-button display plus a low-noise fan for cool and quiet operation. The ultra flat all-metal housing provides 3 and 5-pin DMX inputs and outputs and Power Twist connectors for easy daisy-chaining. The Matrix Panel comes with a safety eye, swivel bracket and two omega brackets and runs on all voltages from 100 - 240 volts AC.

- 5 x 5 Matrix Panel with single pixel control
- 25 x 10 W RGB LEDs
- 5 DMX modes, sound activation and built-in auto run programs
- Master, slave and standalone capability
- Blinder, chase and strobe effects
- Alphabetic character and numeral mapping
- 4 selectable dimming curves
- Flicker-free operation
- Ultra flat housing with low-noise fan
